

# Digital Signatures

## The Need for Training

At all times, the interference by undesirable elements of personal information and property is a source of major concern. Recently, the world turned to use online in all walks of life, especially after the communications revolution. This rapid development in communications soon accelerated the work and increased efficiency and productivity, but unfortunately it also increased opportunities for hackers to practice their undesirable act. Thus, create a safer and more confident road to deliver a safe feeling when user gets access to the online services is a must. Digital Signatures is a strong way to have a safe online communication.
